

Internet, WIFI, PHONE CALLS, E-MAILS at THE LODGE

Phone calls - We have a dedicated phone line for guests' use. This phone line is located in the Lodge. We have our own satellite dish which is 99.9% reliable. Outgoing calls can be made on your cell phone in the main lodge using WIFI.

Because we have just **one phone line** for all our guests' use, the phone can be busy with outgoing calls during peak hours. Peak hours of use are in the morning before we fly out each day, and in the evening when our anglers get back from fishing. Anyone trying to call in will probably get a busy signal, whereas e-mails will be more efficient for getting messages.

We do not have a fax line, only phone and internet.

For incoming messages, we recommend that you have your families, friends, and business associates send e-mails. They can send e-mails directly to personal accounts. We have a computer with printer for internet access for our guests and **we have wireless internet access in the main lodge building.**

We can also receive messages for you. Send to info@tikchik.com. Your e-mails will be printed out and delivered to your room each day before you return from fishing. You can then return calls at your convenience.
