

Internet, WIFI, PHONE CALLS, E-MAILS at THE LODGE

Phone calls - We have a dedicated landline for guests' use. This phone line is located in the main Lodge. We also have our StarLink satellite dish which is fast and reliable. Outgoing calls can be made on your cell phone in the main lodge using WIFI.

Internet - 2023 was our first summer with StarLink, and guests raved about its speed and bandwidth, including the ability to FaceTime with family. It does not extend to our guest cabins, but the main lodge is open at all hours for your convenience.

We do not have a fax line, only phone and internet.

We have a printer with wireless access for our guests and you are also able to forward messages to info@tikchik.com and we can print them for you in our lodge office.

We can also receive messages for you. Send to info@tikchik.com. Your e-mails will be printed out and delivered to your room each day before you return from fishing. You can then return calls at your convenience.
